Resolution

The Sierra Club Broward Group has been involved for decades in the zoning and comprehensive planning of Broward County.

The Executive Committee of the Sierra Club Broward Group met on April 6, 2010 relating to the proposed conversions at the WOODMONT GOLF COURSE from existing open space and recreation uses into urban development.

The Sierra Club Broward Group resolves it is **OPPOSED** to the proposed conversions and urges City and County officials and state reviewers to refuse changing zoning and land use from the customary greenspace in the community.

The Sierra Club Broward Group recognizes the values of the lands to water recharge, wildlife habitat, air quality, aesthetics, open space, outdoor recreational needs of the area, and the many public benefits for which the existing zoning and land planning designations were duly deliberated and assigned. The benefits from this property's current configuration are a central community asset benefiting a wide area.

All members of the Sierra Club Broward Group Executive Committee are hereby authorized to present this Resolution at all public meetings and written deliberations.
